Université de Strasbourg
Campaign 2015: PhD positions

Dear Sirs,

I am writing this recommendation letter by request of Maximiliano Cravero. Maximiliano has achieved his of Computer Science degree (career of five years with final Thesis) in last December 2014. I know him well because I'm currently the Head of the Computer Science Department and I was his professor of *Logic and Algorithms (2ⁿᵈ year subject)*, and *Introduction to Artificial Intelligence (5ᵗʰ year subject)*. He is a very good student and during the time we interacted he proved to be a responsible person with a great capacity for work and in particular, he showed a great interest for research. Particularly, he has developed his final work (named Tesina) under the suppervision of Dra. Cecilia Zanni-Merk and Prof. Stella Marc-Zwecker (Université de Strasbourg-Francia) presenting a valuable work on Semantic classification of urban objects in satellite images.

He has a good average in the career and we can asses that he is in the top 25% of the students.

To conclude, I would like to renew my strong recommendation of Maximiliano for the PhD Program in your University. If you have any further questions regarding this recommendation, please do not hesitate to contact me.

Sincerely,

Ana Casali
Head Department of Computer Science
Professor Department Information and Systems
